

# DHL AIR CHARTER

DEDICATED CAPACITY – INCREASED CONTROL

Today’s dynamic global markets demand a logistics partner that quickly responds with reliable and competitive charter solutions. From delivering the part that restarts a failed production line, the new product stock to be launched in store or the oversized equipment that simply won’t fit on a commercial uplift, there’s no time to take a risk.

That’s why more international businesses are choosing **DHL Global Forwarding** as their **DHL Air Charter** provider. We offer a global network of specialist operators that manage time critical, oversized or high value freight transportation that require dedicated, expert handling.

Our teams quickly source the right air freight capacity to meet your shipments transit or dimensional requirements. From full to part charter we deliver a reliable, cost-effective and tailored solution.

## TRANSIT TIMES TO SUIT YOUR NEEDS

Our solution	Your situation	How we meet your needs
Full Charter	When your freight is; oversized or dangerous, the origin or destination is difficult to reach, there’s no scheduled flights or limited cargo capacity and you need full control of the uplift – full charter is the right choice	<ul style="list-style-type: none"> <li>• Fast and competitive quotes</li> <li>• Packaging, load planning, customs and warehousing advice</li> <li>• Capacity sourced and secured, anywhere in the world</li> <li>• Competitive rates with no hidden charges</li> </ul>
Part Charter (including Part Charter Diversion)	When you need; a more competitive solution for larger freight volumes, a more frequent schedule, you need to reach a destination not served by scheduled cargo operators, you face trade lane capacity issues however your freight can be consolidated with other critical shipments – part charter is the perfect solution	<ul style="list-style-type: none"> <li>• 24/7/365 DHL operational control</li> <li>• Airline charter, ground handling &amp; special equipment contracts managed</li> <li>• Flight monitoring and supervision</li> <li>• Co-ordination of specialist handling equipment, including cranes and custom-built loading structures</li> <li>• Confirmation of delivery upon arrival</li> <li>• Physical supervision by DHL personnel at origin and destination</li> </ul>
